Holes to fix Square

————— **4. Hexagonal with outside and inside two layer holes**

Holes to fix rectangle

————— **5. Rectangle (6 pieces)**

Holes to fix rectangle

————— **6. Hexagonal with lace**

Step 1: Fix the Ring

- Take the ring and insert it into the holes provided on the top hexagonal piece .
- This will help you hang the lantern securely.

Step 2: Attach Top Hexagonal Panel

- Use the hexagonal piece with outer holes.
- Align it with the ring and secure it tightly.

Step 3: Fix 6 Square Panels

- Hook all 6 square side panels into the designated outer holes on the top hexagon.
- Make sure all hooks are locked in firmly to form the lantern's body.

Step 4: Add Inner Hexagonal Base

- Take the hexagonal plate with two-layer holes.
- Fix it at the bottom of the square panels, using the second layer of holes.

Step 5: Attach 6 Rectangle Panels

- Connect the 6 rectangular pieces to the bottom hexagonal base using the marked holes.

Step 6: Add the Final Hexagonal with Lace

- Place the hexagonal plate with lace at the bottom for a decorative finish.
- Match the lace side facing down and align with holes of the rectangle panels.

Your lantern is ready!

insert a light/bulb through the center top light hole.

Note: This lantern package does not include light or bulb.

For best performance and brightness, we recommend using a 12-watt LED bulb (warm white preferred).
